Bokeh

“Bokeh is an interactive visualization library for modern web browsers. It serves as a web-based front end to matplotlib using JavaScript behind the scenes to run in a browser”.

https://docs.bokeh.org/en/latest/index.html

Seaborn

Seaborn is a Python data visualization library based on matplotlib. It provides a high-level interface for drawing attractive and informative statistical graphics.

Ways to Access Jupyter on XSEDE Systems

- TACC Visualization Portal
  - https://vis.tacc.utexas.edu/
- SDSC Expanse*
  - https://education.sdsc.edu/training/interactive/202012_running_jupyter_notebooks_on_expanse/index.html
  - https://hpc-training.sdsc.edu/notebooks-101/notebook-101.html
- PSC Bridges 2
  - https://www.psc.edu/user-resources/software/jupyter

*Run new script, galyleo.sh, using this command:

/cm/shared/apps/sdsc/galyleo/galyleo.sh launch -j notebook -A abc123 -p compute -n 1 -M 8 -t 00:30:00 --conda-env base

Visualization Tutorials

- Scientific Visualization with VisIt, Amit Chourasia, SDSC Director of Visualization Services
  - http://users.sdsc.edu/~amit/scivis-tutorial/

- Hyperglyph Visualization, Jeff Sale
  - https://www.iluvdata.org/antz/toroids/tutorials/intro_lessons/index.html

Let's just jump into it!
